

Make your own
AbraCazebra
 mask!

By
 Thomas & Helen
 Docherty

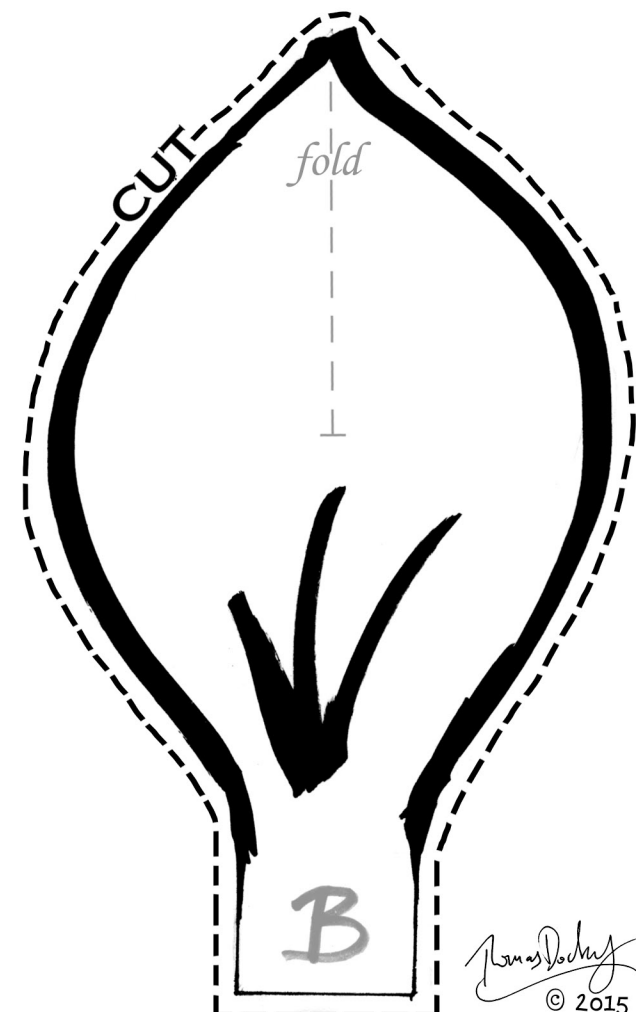

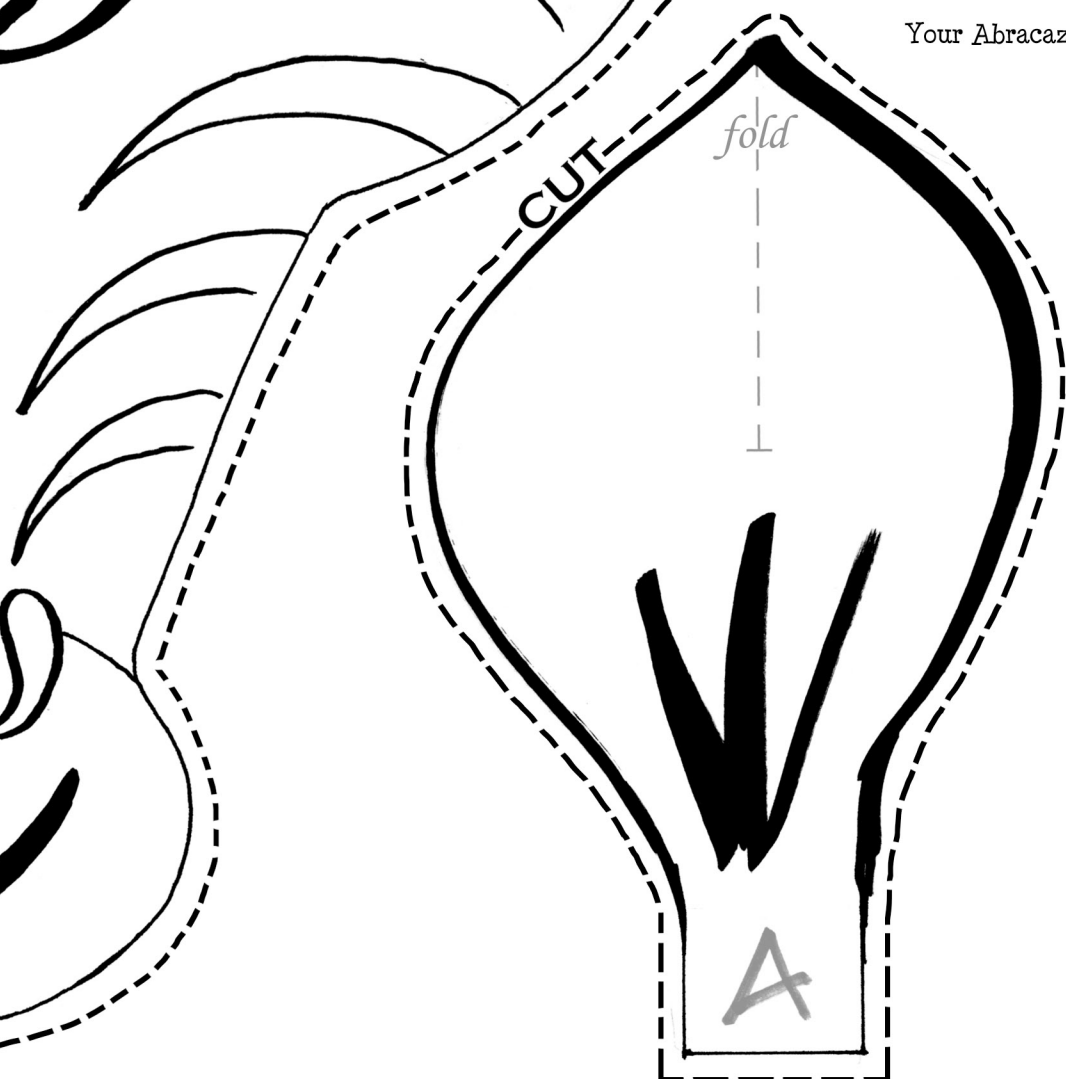

1. Colour in your mask. Your zebra can be any colour you like!
2. Cut carefully around the head, ears and head band, following the black dotted lines (do not cut the grey fold lines).
3. Fold along the two grey fold lines on the head and the one fold line on each ear (if you just fold halfway down the ears they will stick up nicely).
4. Cut out the eye holes (you can start by snipping along the folded part to make a hole before cutting round carefully with the scissors).
5. Stick the ears in place using sticky tape.
6. Using sticky tape, stick one end of the head band to the mask. Put the mask in place. Wrap the other end of the band around the back of the wearer's head until it fits snugly and stick on the other side. Cut off any extra.

Your AbraCazebra mask is ready to wear!
